1. Introduction

SkyDrive is a "cloud" file storage location. You set up an account and it creates an area that looks much like the folders on a drive in storage are provided by Microsoft. Documents, Favorites, Office Live, Documents, Public and Shared Favorites are the folders created by default. You can create more folders, and of course folders within them. it frankly don't make a lot of use of all of its features, mostly posting Excel files I create to assist people in this forum so that they can download them and see the details of the help offered. One thing it does do is give you access to files stored on it from any location where you have an internet connection it can always download a file, work on it on whatever system you are using and save the changed file back to the SkyDrive. Now whether it can set up Excel so that the default location is a folder on your SkyDrive or not well, that's one area I haven't explored and cannot answer.

But perhaps having a general idea of "what it is", which I hope I've given to you, you can take it a little further with other guidance or just plain experimenting in Excel and with SkyDrive. Remember, in Excel's options there is a setting for the default file locations - I don't know of an reason you couldn't set that up as a URL to your SkyDrive although I'm not certain how the logon would be accomplished automatically unless you set your system up to remain logged in/automatically log in when you connect to it.

SkyDrive is a file hosting service that allows users to upload and sync files to cloud storage and then access them from a Web browser or their local device. SkyDrive is a "cloud" file storage, location. We can set up an account and it creates an area that looks much like the folders on a drive in a storage area provided by Our Website. Which is Documents, Favorites, Office Live documents, Public and Shared Favorites are the folders created by default. We can create more folders, and of course folders within them.

We frankly don't make a lot of use of all of its features, mostly posting Documents, images files we can create to assist user in this forum so that they can download by them and see the details of the help offered. One thing it does do is give us access to files stored on it from any location where we have an internet connection. We can always download a file, work on it on whatever system you are using and save the changed file back to the SkyDrive.

Now whether we can set up any type of file so that the default location is a folder on our skyDrive.

Entire folders can be downloaded as a single .zip file with OneDrive. For a single download, there is a limit of Admin Policy.

SkyDrive is a place holder for our personal documents, pictures and public items. At the top there are options for creating on-line (that is, on-cloud) Office document for productivity.

2 OBJECTIVE OF THE PROJECT

SkyDrive is web-based service that allows individuals to construct a public profile within a bounded system. SkyDrive is considered to be the biggest social Sharing Point on the internet. It brings together resources such as sharing photos, books, songs (Audio or Video) movies etc. in one place. The convenience of this promotes fast and frequent communication. For example, houses a version of picture albums, calendar, books, songs, movies and social information updates (mini-feed). It have changed the way individuals communicate with the world, however, everyday designers are finding new and innovative ways in which they can use the sites to connect one person to the rest of society. It allow you to express yourself and keep in touch with All Over World by exchanging messages or comments ,uploading, download, sharing and posting personal profiles describing who you are and your interests, blogs or online diaries, photos, creative writing, artwork, videos, and music.

In Other word we can Say that, **SkyDrive is web-based service that facilitates sharing of resources through links form a cloud across platforms such as mail, face book etc.** Currently each person who uses internet need to frequently share information such as photos, audios, videos and other files with friends, colleagues, customers, relatives etc. Instead of sending copies of files on different platforms, users can upload their files at SkyDrive and can send only the link of files across these platforms.

3 MODULES DESCRIPTION

Major Modules of the application are:

- 1) Login
- 2) Registration (Home Page)
- 3) Search
- 4) Upload
- 5) Download
- 6) Group
- 7) Share Contents
- 8) Policy
- 9) Chatting
- 10) Creating Drives, Folder

Login: In this module user may login by username and password.

Registration: In this module user registered with site using valid mail id .After that user login using valid username and password. After user create a profile in our account.

Search: In this module user search files, videos, music, photo, books, and games from homepage and profile whose status is Public.

Upload: In this module user can upload files, videos, music, photo, books, and games from homepage and profile in the user Specific Folder and Drives.

Download: In this module user can Download search files, videos, music, photo, books, and games from homepage and profile those content whose Status is Public.

Group: In this module user create group and send invitation of join group to any friends, and other Facility is that content Share in joined group and creating groups.

Policy: In this module admin decide the policy for the size of Drive who is use by the user as well as itself Admin. The admin Decide to the Size of particular User.

Chatting: In this module any user chat with members if member is online User send message and view message they also share the content and many more.

Share: In this module any user share on any books or video or any image whose status is public that means private data does not Shareable in group and etc.

4 DATABASES

DATABASE TABLES

1. User Share Group Table

	Column Name	Data Type	Allow Nulls
	Id	int	<input type="checkbox"/>
	JoinUserId	uniqueidentifier	<input checked="" type="checkbox"/>
	GroupID	int	<input checked="" type="checkbox"/>
			<input type="checkbox"/>

2. User In Roles Table

	Column Name	Data Type	Allow Nulls
	UserId	uniqueidentifier	<input type="checkbox"/>
	RoleId	uniqueidentifier	<input type="checkbox"/>
			<input type="checkbox"/>

3. User Join Group Table

	Column Name	Data Type	Allow Nulls
	Id	int	<input type="checkbox"/>
	JoinUserId	uniqueidentifier	<input checked="" type="checkbox"/>
	GroupID	int	<input checked="" type="checkbox"/>
			<input type="checkbox"/>

4. User group Table

	Column Name	Data Type	Allow Nulls
	Id	int	<input type="checkbox"/>
	UserId	uniqueidentifier	<input checked="" type="checkbox"/>
	GroupName	varchar(200)	<input checked="" type="checkbox"/>
	Block	bit	<input checked="" type="checkbox"/>
			<input type="checkbox"/>

5. User Folder Table

	Column Name	Data Type	Allow Nulls
▶ 🔑	id	int	<input type="checkbox"/>
	userid	uniqueidentifier	<input checked="" type="checkbox"/>
	driveid	int	<input checked="" type="checkbox"/>
	foldername	varchar(MAX)	<input checked="" type="checkbox"/>
	folderdate	datetime	<input checked="" type="checkbox"/>
	size	int	<input checked="" type="checkbox"/>
			<input type="checkbox"/>

6. User Files Table

	Column Name	Data Type	Allow Nulls
▶ 🔑	id	int	<input type="checkbox"/>
	userid	uniqueidentifier	<input checked="" type="checkbox"/>
	driveid	int	<input checked="" type="checkbox"/>
	folderid	int	<input checked="" type="checkbox"/>
	filename	varchar(MAX)	<input checked="" type="checkbox"/>
	filetype	varchar(MAX)	<input checked="" type="checkbox"/>
	fileext	varchar(MAX)	<input checked="" type="checkbox"/>
	filepath	varchar(MAX)	<input checked="" type="checkbox"/>
	share	varchar(50)	<input checked="" type="checkbox"/>
	filedate	datetime	<input checked="" type="checkbox"/>
	size	bigint	<input checked="" type="checkbox"/>

7. User Drive Table

	Column Name	Data Type	Allow Nulls
▶🔑	id	int	<input type="checkbox"/>
	userid	uniqueidentifier	<input checked="" type="checkbox"/>
	drivename	varchar(MAX)	<input checked="" type="checkbox"/>
	drivedate	datetime	<input checked="" type="checkbox"/>
	size	int	<input checked="" type="checkbox"/>
			<input type="checkbox"/>

8. User Policy Table

	Column Name	Data Type	Allow Nulls
▶🔑	id	int	<input type="checkbox"/>
	userid	uniqueidentifier	<input checked="" type="checkbox"/>
	drivesize	varchar(MAX)	<input checked="" type="checkbox"/>
	policydate	datetime	<input checked="" type="checkbox"/>
			<input type="checkbox"/>

9. Users Table

	Column Name	Data Type	Allow Nulls
▶	ApplicationId	uniqueidentifier	<input type="checkbox"/>
🔑	UserId	uniqueidentifier	<input type="checkbox"/>
	UserName	nvarchar(256)	<input type="checkbox"/>
	LoweredUserName	nvarchar(256)	<input type="checkbox"/>
	MobileAlias	nvarchar(16)	<input checked="" type="checkbox"/>
	IsAnonymous	bit	<input type="checkbox"/>
	LastActivityDate	datetime	<input type="checkbox"/>
			<input type="checkbox"/>

10. Roles Table

	Column Name	Data Type	Allow Nulls
▶	ApplicationId	uniqueidentifier	<input type="checkbox"/>
🔑	RoleId	uniqueidentifier	<input type="checkbox"/>
	RoleName	nvarchar(256)	<input type="checkbox"/>
	LoweredRoleName	nvarchar(256)	<input type="checkbox"/>
	Description	nvarchar(256)	<input checked="" type="checkbox"/>
			<input type="checkbox"/>

11. Profile Table

	Column Name	Data Type	Allow Nulls
🔑	UserId	uniqueidentifier	<input type="checkbox"/>
	PropertyNames	ntext	<input type="checkbox"/>
	PropertyValuesString	ntext	<input type="checkbox"/>
	PropertyValuesBinary	image	<input type="checkbox"/>
	LastUpdatedDate	datetime	<input type="checkbox"/>
			<input type="checkbox"/>

12. Membership Table

Column Name	Data Type	Allow Nulls
ApplicationId	uniqueidentifier	<input type="checkbox"/>
UserId	uniqueidentifier	<input type="checkbox"/>
Password	nvarchar(128)	<input type="checkbox"/>
PasswordFormat	int	<input type="checkbox"/>
PasswordSalt	nvarchar(128)	<input type="checkbox"/>
MobilePIN	nvarchar(16)	<input checked="" type="checkbox"/>
Email	nvarchar(256)	<input checked="" type="checkbox"/>
LoweredEmail	nvarchar(256)	<input checked="" type="checkbox"/>
PasswordQuestion	nvarchar(256)	<input checked="" type="checkbox"/>
PasswordAnswer	nvarchar(128)	<input checked="" type="checkbox"/>
IsApproved	bit	<input type="checkbox"/>
IsLockedOut	bit	<input type="checkbox"/>
CreateDate	datetime	<input type="checkbox"/>
LastLoginDate	datetime	<input type="checkbox"/>
LastPasswordChangedDate	datetime	<input type="checkbox"/>
LastLockoutDate	datetime	<input type="checkbox"/>
FailedPasswordAttemptCount	int	<input type="checkbox"/>
FailedPasswordAttemptTimestamp	datetime	<input type="checkbox"/>
FailedPasswordAnswerAttemptCount	int	<input type="checkbox"/>
FailedPasswordAnswerAttemptTimestamp	datetime	<input type="checkbox"/>
Comment	ntext	<input checked="" type="checkbox"/>
		<input type="checkbox"/>

5 Input-Output forms (Screen Layout)

Registration Page

The screenshot shows a web browser window displaying the SkyDrive registration page. The browser's address bar shows the URL `http://localhost:493...ydrivef/Default.aspx`. The page features the SkyDrive logo at the top left. Below the logo, there is a search bar and a navigation menu with links for 'Most Visited', 'Getting Started', 'Suggested Sites', and 'Web Slice Gallery'. The main content area is divided into two sections. On the left, a grey box contains a description of SkyDrive as a web-based service for sharing resources through links from a cloud across platforms like mail and Facebook. It mentions that users frequently share information such as photos, audios, videos, and other files with friends, colleagues, customers, and relatives. A 'Learn more' button is located at the bottom of this box. On the right, the 'New User Sign up' section contains a form with the following fields: 'User Name' (filled with 'PawanKumar'), 'Password' (filled with eight dots), 'Confirm Password' (filled with eight dots), 'E-mail' (filled with 'pawan@gmail.com'), 'Security Question' (filled with 'name'), and 'Security Answer' (filled with 'pawan'). A 'Log In' button is positioned above the 'Forgot Password?' link. A 'Create User' button is located at the bottom right of the sign-up form. The Windows taskbar at the bottom shows various application icons and the system clock indicating 12:31 on 06-05-2014.

SkyDrive

SkyDrive is web-based service that facilitates sharing of resources through links form a cloud across platforms such as mail, facebook etc. Currently each person who uses internet need to frequently share information such as photos, audios, videos and other files with friends, colleagues, customers, relatives etc.
